🔗 LeetCode

Education

Bachelor of Technology in Computer Science Engineering

Expected Graduation: 2027

Madhav Institute of Technology and Science (MITS), Gwalior

CGPA: 7.6 / 10

Class XII

2022

IINSIGHT, Nagpur

89.50%

Skills

Languages: C++, JavaScript, TypeScript, C

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap, EJS, SCSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Databases: MongoDB, Mongoose, SQL

Tools: Git, GitHub, VS Code, Cursor, Postman, Render

Concepts: Data Structures, OOPs, DBMS, OS, Computer Networks, MVC Architecture, CRUD Operations

Experience

Software Engineer Intern

June 2025 – July 2025

Web Development (Remote)

jobsdoor360.in

- Engineered full-stack web features using **Node.js**, **Express.js**, **MongoDB**, and **EJS** following MVC architecture, contributing to 3+ production modules.
- Designed and integrated RESTful APIs with CRUD operations to manage dynamic application data efficiently.
- Implemented server-side rendering and backend validation, reducing invalid data submissions by enforcing strict input checks.
- Collaborated via **Git** and **GitHub** using branching, pull requests, and code reviews in a remote team environment.

Projects

Personal Portfolio Website | *Node.js, Express.js, MongoDB, Tailwind CSS, NodeMailer, Vibe Coding* | **Live** | **GitHub**

- Architected a full-stack portfolio with a Node.js/Express backend, MongoDB-backed contact form, and a dark-themed glassmorphism UI using Tailwind CSS, deployed on Render.
- Implemented a token-protected **admin dashboard** to manage messages and integrated **NodeMailer** for real-time email alerts, handling 100% of contact submissions automatically.
- Enforced **rate limiting** (10 requests/15 min) against spam and added a `/api/health` endpoint for live server and database status monitoring.

AI Interview Prep Platform | *React.js, Node.js, Express.js, MongoDB, Google Gemini AI, SCSS* | **Live** | **GitHub**

- Engineered a full-stack AI platform using **Google Gemini 2.5 Flash** that analyzes resumes against job descriptions to generate ATS-optimized resumes, match scores, and structured day-by-day prep plans.
- Designed a **Generative AI** pipeline with structured prompt engineering and automatic retry/fallback logic, achieving reliable JSON responses even under high API load (503 errors).
- Implemented **JWT authentication**, PDF parsing, HTML-to-PDF conversion via **puppeteer**, and file uploads via **multer** for secure end-to-end resume processing.

WanderLust | *Node.js, Express.js, MongoDB, EJS, Bootstrap* | **Live** | **GitHub**

- Developed a full-stack travel listing platform supporting full CRUD operations for property listings with secure user authentication and authorization.
- Designed 10+ REST API endpoints and integrated **MongoDB via Mongoose ODM** with server-side rendering using EJS templates.
- Enforced role-based access control and form validation, ensuring only authorized users can modify or delete listings.

Achievements

- **National-Level Hackathon Winner – HACKSAGON 2025:** Won 1st place among **600+ registered teams** at a National Level Software & Hardware Hackathon organized by ABV-IIITM IEEE Student Branch, held at ABV-IIITM Gwalior.
- **Meritocracy Award – MITS Day (10 March):** Awarded for academic excellence and outstanding performance in a national-level technical event.
- **PR Lead – GDG On Campus (GDGOC):** Managed outreach initiatives and coordinated technical events for 200+ member campus developer community.
- **Entrance Exams:** JEE – 92.68 percentile, MHT-CET – 95.36 percentile
